Specifications for leather items

- Bovine leather. Chrome tannery. Leather thickness from 1,2 to 1,4 mm
- Bending resistance: Over 50.000 C > **ISO 5402**
- Light solidity: Over 5 in Blu scale> **ISO 105 B02**
- Scrubbing solidity > **ISO 11640**

	Test	Value
Dry	500	> 4
Wet	80	> 4
Sweat	50	> 4

- Tearing solidity: Over 20 N > **ISO 3377-1**
 - Finish adherence: Over 2,5 N/cm > **ISO 11644**
 - Water extract pH: Over 3,5
 - Number (only for pH > 4) At least 0,7 > **ISO 4045**
 - Free from pentachlorophenol, a substance harmful to the ozone layer.
 - The leather is tanned using chrome, and tanned again with synthetic resin to increase solidity and elasticity at the same time.
 - Dyeing is carried out with aniline using the cylinder process.
- The refinition is carried out using a water process.
- Leather cleaning should be done using neutral soap and water or products suitable for leather.

How to calculate the quantity of leather needed:

$M^* \times 1,61 = Y \text{ m}^2$

$Y \text{ m}^2 / 4,5 = \text{number of leather hides needed}$

(*) M= Linear meters needed (considering a 140 cm width fabric)
